 - Custom Patient Satisfaction with Reputation Management

Product Descriptions

Outcomes

Functional PROMs (Standard Protocols)

Fixed set of patient-reported outcomes measures, for a fixed set of procedures, distributed at fixed time intervals. Set of PROMs, including Computer Adaptive Testing (CAT), are included for many specialties.

Data Export with Filters

Customizable exports of raw data

Benchmark by Institution, Doctor, Procedure, and Groups

View and rank patient engagement and PROM scores by providers, procedure, specialty, and institution -- incorporate regional and global benchmarking.

Patient Surgical Satisfaction

Standard surgical satisfaction outcomes measures. Choose from NASS or PASS

Standard Surgical Forms

Complement your PROs with ready to use surgical documentation forms to capture intra-operative data elements

Patient Satisfaction

Measure patient experience using your choice of standard satisfaction surveys.

Customizable Surgical Forms

Customizable staff-facing forms to capture pre-op, intra-op and post-op data elements of your choosing by procedure.

Outcomes-Based Care Pathways with SMS

Care Pathway with evidence based/PRO data feed from OBERD global database. Also educational content and patient notifications sent to patients in the pre- and post-acute periods via email and SMS text-message.

Advanced Reporting

Three extensive modules to help you create and view custom reports meaningful to you and your practice.

Alerts (Staff-Facing)

Alert care team to intervene on adverse events, ignored questions, score threshold, missed therapies, and more

Adverse Events (Patient-Facing)

Capture post-operative adverse events through patient-reported forms and send proactive alerts.

Patient Assessment Tools

Set expectations and guide recovery with contextualized PRO scores at the patient level, comparing alike patients pre and post procedure.

Patient Scorecards

Real Time feedback after every filled form. Contextualize outcomes/care pathways/satisfaction data for patients using patient-centric scorecards.

eConsenting (FDA-11 Compliant)

FDA-11-compliant patient reported and guardians consenting.

Custom Protocols

Collect any validated PRO form, with real-time scoring/reporting, or create your own custom form.

Custom Reports

Utilize OBERD's Research Science Team to filter, visualize, and benchmark your data. Customizable scheduled reports generated and sent to your inbox.

Product Descriptions

Included**Customized Patient Messaging**

Tailor your message to patients via email and text with images, photo, and/or video/animation.

Value Added Features

Patient phone and email support; Hosted on AWS servers with SOC3, HITRUST certification, GDPR, and HIPAA compliance.

Automated Reporting Dashboards

Create, save, and scheduled reports released to staff. Reports support global trending, visualization, and more.

Patient Enrollment - Manual Input

Use OBERD to enroll patients into data collection protocols.

Add-Ons**Quality of Life Data Capture (Preset Protocols)**

Standardized QoL forms (PROMIS-10, VR/SF-12 and CAT) collected at standard timepoints for a any set of procedures.

Data Import with Smart Filters

Import your historical data into OBERD using smart filters that validated data integrity, format, and scores before inserting to the production databases.

MIPS, CJR/AJRR Reporting

Satisfy MIPS Quality and CPIA using OBERD automated tools.

OpNotes

Provider-facing media rich digital forms to capture any pre-op, intra-operative, and post-op data elements with support to upload high resolution radiographic images.

Custom Integration, Outbound, Inbound ADT/SIU

OBERD integrates with existing systems to automate data collection and send data where providers need it, including the EMR and/or external repositories.

SMS (Text Messaging)

Sent text message notifications and form/appointment reminders to patients allowing access to input data through a mobile browser and/or through text-message form-fill.

Clinical Intakes

Streamline clinical process and efficiencies with digital clinical intake data collection (customize HH, ROS, HPI forms and more), and map data to patient chart in EMR.

Custom Patient Satisfaction with Reputation Management

Customizable patient satisfaction surveys to capture patient experience, NPS and more. Includes OBERD's reputation management solution to promote satisfied patients to share their experience through online rating sites such as Healthgrades, Vitals, Google, and Facebook.
